Re: *Remedial Action Completion Report dated December 2008 on the Swann Park Project*

Dear Messrs French and Cook:

The Maryland Department of the Environment's (the Department) CHS Enforcement Division has reviewed the Remedial Action Completion Report on Swann Park. This report documents the implementation of the remedial action at Swann Park as required by the Department's April 24th, 2007 Order Requiring Environmental Response (Order). The implementation of the remedial action is described in the Comprehensive Investigation Report and Remedial Alternatives Analysis (CIRRAA) dated October 2007 and in accordance with follow-up revisions accepted by the Department on January 9, 2008. The Department believes that the Remedial Action Completion Report demonstrates the satisfactory conclusion of the remedial work at Swann Park to address soil contamination as approved in the CIRRAA and required by the Order.

Consequently, the cleanup requirements in the April 2007 Order have been fulfilled. While Honeywell's risk assessment was not deemed adequate by the Department, the cleanup requirements of the Order have been satisfied with the implementation of the 2-foot clean soil cover, and therefore the Order is considered closed.

As always, the Department reserves the right to require additional investigation or remediation of the site if previously undiscovered or exacerbated levels of contamination are discovered.

Mr. Christopher M. French
Mr. Michael P. Cook
